Addendum — 2025-12-26 00:25

The cryptographic reference (CID / hash) associated with this work remains fully intact and continues to represent the state of the digital artifact at the moment of its original fixation.

During ongoing maintenance and observation of the surrounding digital infrastructure, subsequent changes in the availability or behavior of certain referenced elements were identified. These changes do not affect the original artifact, its authenticity, or the integrity of its cryptographic record. They arise from external, platform-dependent conditions and temporal system behavior.

This note does not amend or overwrite the original record.
It exists as an extension of the work's living provenance, documenting contextual evolution without altering the fixed historical state.

The original reference remains authoritative.
This addendum serves solely to preserve contextual continuity over time.

Contextual extension documented separately as part of the Living Provenance framework.
